4. Between January 1, 2018, and December 31, 2018, what was the average daily population of your jail facilities?

- INCLUDE inmates who participated in weekend programs that allow offenders to serve their sentences of confinement only on weekends (e.g., Friday—Sunday).
- To calculate the average daily population, add the number of persons for each day between January 1, 2018, and December 31, 2018, and divide the result by 365.
- If daily counts are not available, estimate the average daily population by adding the number of persons held on the same day of each month and divide the result by 12.
- If average daily population cannot be calculated as directed above, then estimate the typical number of persons held in your jail confinement facilities each day.
