MAR: Pravastatin 20mg one tab at bedtime, EC ASA 81mg one at bedtime, Metoprolol Tart 50mg one tab 2 x a day, lorsartan 50mg one at bedtime.

Medical Summary: At approx. 1853 offender Lawrence Murray was on floor of shower room. I, DebbieClaunch, LPN was called there per Sgt Jake Lawrence. I checked for breathing and pulse. Offender Murray did not have a pulse nor was he breathing. Nail beds were blue. There was no blood pressure. Due to him being on floor with puddles of water I asked Sgt Lawrence and Dep Burns to put him on a mat to slide him out of shower room away from the water. AED could not be used at that time due to the puddles of water. At approx. 1858 Dep. Trey Herren arrived to help get offender Murray on mat and then get him out of shower room. At approx. 1900 CPR was begun and AED machine was hooked up to Offender Murray. Still no pulse or breathing. AED never gave a shock to Offender Murray.. CPR continued to approx. 1915 when Advanced Ambulance arrived to access Offender Murray. They ran an EKG strip. The strip showed a flat line. The paramedics advised that Offender Murray was deceased.
