AUTOPSY REPORT

CAUSE OF DEATH
Combined intoxication by morphine and fentanyl

MANNER OF DEATH
Accident

Jimmie Smith 2-16-2024

Jimmie Smith, M.D., J.D. Forensic Pathologist — Date

Opinion

Final Diagnosis

CAUSE OF DEATH: Combined intoxication by morphine and fentanyl

MANNER OF DEATH: Accident

Summary

The decedent was a 36-year-old male prison inmate, with no known medical history reported. He was found unresponsive. He was given Narcan with no response.

[redacted]Toxicological testing of blood detected naloxone, morphine, fentanyl, and metabolites of fentanyl.

Based on all information known to me at this time, it is my opinion that Andrew Zachary died as the result of combined intoxication by morphine and fentanyl. The circumstances surrounding the death, as determined by the investigative and postmortem findings, indicate that the manner of death is accident.

The remainder of this autopsy report (including the redacted info above) is on file with the Incarceration Transparency project, but is not included here as it is not relevant to proof or cause of death.
