MONROE, La. (KNOE) - Correctional officers found 44-year-old Lillie Young unresponsive in her bed on the morning of Oct. 29. Young was pronounced dead after first responders and EMS rushed to the scene.

Authorities say Young had a preexisting medical condition, and the cause of death is unclear at this time. An autopsy is pending at Parish Forensics, where an official cause of death can be determined.

" Our preliminary investigation shows no signs of foul play, and the death appears to be due to natural causes. However, a full investigation is being carried out," said Sheriff Hedrick.
